## DETAILED ACTION

### *Allowable Subject Matter*

1. Claims 1-8 are allowed over the prior art of record.
2. The following is an examiner's statement of reasons for allowance:

Applicant's claimed limitations are allowable because the prior art fails to disclose an object having a metal film on it that is introduced to a fluid flow for SPR measurements; applicant's claimed limitations provide support for the preamble and therefore makes the claims allowable over the prior art of record. Further, applicant's remarks dated June 30, 2005 provide remarks, which the examiner agrees that makes the limitations allowable.

Regarding claim 1, the prior art fails to disclose or make obvious a method for collecting SPR spectra of an object in flow, where the object has a metal film capable of exhibiting SPR including the steps of introducing the object into a fluid flow and introducing the fluid containing the object into a flow imaging system, and in combination with the other recited limitations of claim 1.

Regarding claim 2, the prior art fails to disclose or make obvious a method for collecting data corresponding to interactions between a first type of molecule and a second type of molecule using surface plasmon resonance (SPR) spectra having the steps of providing a plurality of objects including a metal film capable of exhibiting SPR; functionalizing each object in the plurality of objects by attaching at least one molecule of the first type to the object, wherein the first type of molecule is selected because said first type of molecule preferentially interacts with the second type of molecule; introducing the objects that have been functionalized

into a fluid; introducing a plurality of molecules of the second type into the fluid, such that an association phase is initiated, and in combination with the other recited limitations of claim 2.

Claims 3-7 are allowed by the virtue of dependency on the allowed claim 2.

Regarding claim 8, the prior art fails to disclose or make obvious a method for collecting SPR spectra of an object in a flow having the steps of introducing the object having a metal film that is cable of exhibiting SPR into a fluid and introducing the fluid containing the object into a flow, and in combination with the other recited limitations of claim 8.

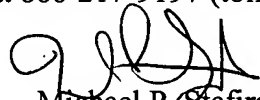

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
